Web Development	NodeJS	PHP	Codeigniter	Laravel	Java Spring Boot	Python
App Development	iOS	Android	Swift	Kotlin	Flutter	Xamarin
Front-End	Angular	React JS	Knockout JS	Express JS		
Back-End	Node JS	Python	Express JS	Java	Spring	
Microsoft	ASP.NET	C#	ASP.NET Core			
Open Source	WordPress	Shopify	Magento			
Database	MySQL	Oracle	MongoDB			
Servers	Amazon Web Services	Google Cloud	Microsoft Azure			
DevOps	Kubernetes	Jenkins	Chef	Maven		

Technologies

Our Process

- 01**  **Discovery** – Understanding Needs
We delve into your requirements, goals, and target audience to define the software's purpose.
- 02**  **Design** – Building the Blueprint
We craft user interfaces, user experience (UX) flows, and a technical roadmap to guide development.
- 03**  **Development** – Bringing it to Life
Our skilled developers translate the design into functional, high-quality code.
- 04**  **Testing** – Ensuring Excellence
Rigorous testing identifies and resolves bugs to guarantee a smooth user experience.
- 05**  **Deployment** – Lift-off!
We seamlessly deliver the software to your users, whether it's on-premise, cloud-based, or mobile.
- 06**  **Support** – We're Here to Help
Our dedicated support team provides ongoing assistance to ensure user satisfaction.

Our Portfolio

Manjha - Revolutionizing Fishery Market

Project Overview: Developed a social media application similar to Instagram/Reddit with in-app audio and video call functionality, chat messaging, content publishing, and AI-based content moderation to avoid hateful content. Features include public/private groups and anonymous posting.

Outcome

- MANJHA established itself as a leading e-commerce platform in the fishery market, contributing to the empowerment of fishery communities nationwide.
- With a thriving ecosystem of buyers, sellers, and enthusiasts, MANJHA continues to redefine the landscape of the fishery industry, one successful transaction at a time.
